Portland State UNIVERSITY

Critical Terms in Information Systems

Adapted from Information Systems: A Manager's Guide to Harnessing Technology (v 10.1) by John Gallaugher

This glossary is part of your **Comparative Analysis Project.** Refer to the full Assignment Guide in Canvas for detailed steps and grading criteria.

Chapter 1: Setting the Stage - Technology and the Modern Enterprise

- Market capitalization
- R&D
- Server farms
- Pivoting
- Term sheet
- Hype cycle

Chapter 6: Moore's Law and More

- Moore's Law
- Microprocessor
- Latency
- random-access memory (RAM)
- Volatile memory
- Nonvolatile memory
- Flash memory
- SSD
- Semiconductors
- Price elasticity
- Multicore microprocessors
- Supercomputers
- Massively parallel
- Latency

Chapter 10: Platforms, Network Effects, and Competing in a Winner-Take-All World

- Network Effects
- Platforms
- Staying power
- Switching Costs
- Total cost of Ownership (TCO)
- Customer Acquisition Costs
- Metaverse
- Complementary benefits
- Platforms
- APIs
- One-sided market
- Same-side exchange benefits
- Two-sided market
- Cross-side exchange benefits
- Oligopoly
- Technological leapfrogging
- Blue Ocean Strategy
- Backward compatibility
- The Osborne Effect
- Freemium

Chapter 15: Understanding Software - A Primer for Managers

- Operating system
- User interface (UI)
- Platforms
- Desktop software
- Enterprise software
- Enterprise resource planning (ERP)
- Customer relationship management (CRM)
- Supply chain management (SCM)
- Business intelligence (BI) systems
- Database management system (DBMS)
- Server
- APIs (Application programming interfaces)
- Programming language
- Scripting languages
- Low code/no code
- Software development lifecycle
- Waterfall

- Feature creep
- Agile development
- Scrum
- Compliance
- Total cost of ownership (TCO)
